

## COMPLIANCE TRAINING SERVICES

**A**sset Learning under Asset Health Manage™ provides compliance training services that allow companies of all sizes to offer effective, web-based compliance training in areas such as HIPAA and Anti-Harassment.

### **HIPAA Training**

A lack of HIPAA comprehension by employees may lead to civil or criminal penalties unknowingly. In an effort to help

make this important training as efficient and effective as possible, Asset Learning, partnering with the nationally known law firm of Seyfarth Shaw, has developed The HIPAA Roadmap – an online system that provides your employees with the accurate, concise information they need to perform their duties while remaining HIPAA compliant.

The HIPAA Roadmap is designed specifically for HR, Employee Benefits and other

personnel who come into contact with Protected Health Information (PHI) in a corporate environment, such as in the case of a self-insured health plan. The HIPAA Roadmap is a complete web-based system with registration and tracking for easy implementation. The HIPAA Roadmap is flexible and can be modified to conform to state law and your organization's specific policies.

### **Anti-Harassment Training**

In an effort to help create a positive work culture, Asset Learning has created the Anti-Harassment Action System to help employees prevent offensive work behavior, thus decreasing the risk of legal action, lawsuits, millions in damages, boycotts and government action against your company. This program is designed to help employees recognize sexual harassment as a workplace problem, identify strategies for harassed workers to follow in seeking redress and outline legal avenues through which

harassment complaints can be pursued. This program helps your employees better understand what behavior constitutes harassment so that they can avoid committing it themselves, as well as help managers who are interested in preventing sexual harassment within their organizations.

Each 15-minute lesson includes three action steps that will help your team “boost” their retention of impermissible workplace conduct, reinforced through scenarios, tips, articles and web links. The system also tests

your employees’ understanding of sexual harassment issues and creates an electronic record of their performance. If you are serious about fostering an anti-harassment culture, Asset Learning’s Anti-Harassment Awareness System is right for you.

For additional information on how Asset Learning can assist you with your compliance training needs, contact Corey Perlman at (248) 822-2863.
